

Glorifying Terrorism

a typeface by Feòrag NicBhrìde

This font started off because I needed a couple of dingbats for a book I was laying out, then I got carried away. It features portraits of various terrorists and images related to terrorism. The book is *Glorifying Terrorism*, an anthology of original science fiction edited by Farah Mendlesohn. With an introduction by Andrew McKie of the Daily Telegraph, it features contributions by top UK SF writers Ian Watson, Gwyneth Jones, Ken MacLeod, and Charles Stross. The anthology highlights the flaws in recent UK government legislation that criminalizes 'encouragement of terrorism'. You can buy a copy of it at <http://rackstrawpress.nfshost.com/>

Some of the people illustrated in this font were also chosen to highlight the flaws in the legislation. If you are wondering why I've included a particular respected world leader, religious figure, freedom fighter or champion of the underdog, it's because their actions mean they could be considered to be those of a terrorist. See the next page for a list of glyphs and links to more information, where relevant.

This archive contains the PostScript Type 1 version for the Macintosh and includes the following files:

- **About Glorifying Terrorism T1.pdf** - this file.
- **GlorifyingTerrorism.suit** - suitcase containing the bitmaps. In MacOS X, double click on this to see a preview. Click on the "Install Font" button to install. For earlier versions of Mac OS, this file should go in the 'Fonts' folder in the System Folder.
- **GloriTer** - the printer font. This will be automatically installed under MacOS X when you click the "Install Font" button as described above. For earlier versions of MacOS, it should join the suitcase in the 'Fonts' folder.
- **GloriTer.afm** - an Adobe Font Metrics file. Only a few applications use these and you probably already know if you need it.

True Type versions for the Macintosh and PC are also available, plus Type 1 for UNIX.

License and Notes

This typeface is licensed under the Creative Commons Attribution-NonCommercial-ShareAlike License. To view a copy of this license, visit <http://creativecommons.org/licenses/by-nc-sa/2.0/> or send a letter to Creative Commons, 559 Nathan Abbott Way, Stanford, California 94305, USA.

Note that the license includes the provision "Any of these conditions can be waived if you get permission from the copyright holder". You already have my permission to *use* this font for commercial purposes, such as in a magazine or advertising, and do not need to ask (though a copy of whatever you used it for would be nice). If you wish to *redistribute* this font commercially, including on a website with paid advertising, you must still get my permission to do so and "you must make clear to others the license terms of this work".
